## **Home Inspection Checklist**

Use a checklist like this to make sure that you are looking at all parts of the house. Check off those items that are in good condition and make notes about those that are not. (Note that this list describes an ideal house, but in our experience no house is perfect – not even brand new ones!!)

## Please Note:

This checklist should not be relied upon as a home inspection report, nor should it be considered a substitute for a home inspection. This list is representative, but NOT exhaustive. If you require a home inspection, contact Arch Inspection or another qualified, educated, licensed, experienced home inspector in your area.

Property Address:
<u>Grounds</u>
☐ Proper grading drainage away from house
☐ No evidence of standing water
☐ No leaks from septic tank or leech field
☐ Yard, landscaping, trees and walkways in good condition
☐ No branches or bushes touching house or overhanging the roof
☐ Exterior structures (fences, sheds, decks, retaining walls, detached garages)
in good condition, no evidence of termite damage or rotted wood
☐ Railings on stairs and decks are adequate and secure
$\hfill\square$ Driveways, sidewalks, patios, entrance landings in good condition, and
pitched away from structure
☐ Downspout drainage directed away from structure
<u>Structure</u>
☐ Ridge and fascia board lines appear straight and level
☐ Sides of house appear straight, not bowed or sagging
☐ Window and doorframes appear square (especially bowed windows

ARCH INSPECTIONS LLC	HOME INSPECTION CHECKLIST
☐ Visible foundation in good co	ondition - appears straight, plumb, with no significant cracks
Exterior Surfaces	
☐ Adequate clearance between	n ground and wood siding materials (6" minimum); no wood-
to-earth contact	
☐ Siding: no cracking, curling,	loose, rot or decay
☐ Masonry veneers: no cracks	in joints, no broken, spalling or flaking components
☐ Stucco: no large cracks (disc	cuss all stucco cracks with a professional inspector)
☐ Vinyl or aluminum siding: no	dents, damage, no bowing or loose siding
☐ No vines on surface of struct	ure
☐ Exterior paint or stain: no flal	king or blisters
☐ No stains on exterior surface	es
Windows, Doors and Wood Trim	
☐ Wood frames and trim pieces	s are secure, no cracks, rot or Decay
☐ Joints around frames are cau	ulked
☐ No broken glass (window or insulated window seals.	storm panes) or damaged screens, no broken double-paned,
☐ Mullion glazing compound in	good condition
☐ Storm windows or thermal gl	
☐ Drip caps installed over wind	
<u>Roof</u>	
☐ Asphalt composition shingles	s: no curling, no cupping, no loss of granulation particulate, no
	shingles, no more than two layers of roofing
<u>_</u>	mold, rot or decay, no cracked/broken/missing shingles, no
_	es, no cracks or splits, minimal blisters/"alligatoring" and
·	licates improper drainage), sealed tar at flashings
☐ Flashing around roof penetra

HOME INSPECTION CHECKLIST

ARCH INSPECTIONS LLC

	Electrical outlets test properly (spot check)
	Heating/cooling source in each habitable room
	Evidence of adequate insulation in walls
	Fireplace: no cracking or damaged masonry, no evidence of back-drafting (staining on fireplace façade), damper operates properly, flue has been cleaned, flue is lined
<u>Kitch</u>	<u>en</u>
	Working exhaust fan that is vented to the exterior of the building
	Ground Fault Circuit Interrupter ("GFCI") protection for electrical outlets within 6 feet of the sink(s)
	Dishwasher: drains properly, no leaks, baskets, door spring operates properly
	No leaks in pipes under sinks
	Floor in cabinet under sink solid, no stains or decay
	Water flow in sink adequate
	No excessive rust or deterioration on garbage disposal or waste pipes
	Built-in appliances operate properly
	Cabinets in good condition: doors and drawers operate properly
<u>Bathr</u>	<u>rooms</u>
	Working exhaust fan that doesn't terminate in the attic space
	Adequate flow and pressure at all fixtures
	Sink, tub and shower drain properly
	Plumbing and cabinet floor under sink in good condition
	If sink is metal, it shows no signs of rust, overflow drain doesn't leak
	Toilet operates properly
	Toilet stable, no rocking, no stains around base
	Caulking in good condition inside and outside of the tub and shower area
	Tub or shower tiles secure, wall surface solid
	No stains or evidence of past leaking around base of bath or shower

**HOME INSPECTION CHECKLIST** 

ARCH INSPECTIONS LLC	HOME INSPECTION CHECKLIST
☐ Smoke and carbon monoxide detec	ctors where required by local ordinances
☐ Stairway treads and risers solid	
☐ Stair handrails where needed and i	n good condition
☐ Automatic garage door opener ope	rates properly, stops properly for obstacles
Basement or Mechanical Room	
☐ No evidence of moisture	
☐ Exposed foundation; no stains no n	najor cracks, no flaking, no efflorescence
☐ Visible structural wood: no sagging insects, sills attached to foundation	, no damage, no decay, no stains, no damage from with anchor bolts
☐ Insulation at rim/band joists	
Crawl Space	
☐ Insulation on exposed water supply	, waste and vent pipes
☐ Insulation between crawl space and heated area	d heated areas, installed with vapor barrier towards
☐ No evidence of insect damage	
☐ No evidence of moisture damage	
<u>Plumbing</u>	
	nce of leaks, no signs of stains on materials near pipes ards outlet to septic/sewage system
□ Water heater: no signs of rust, vent hot water for the number of bedroom	red properly, sized to produce adequate quantities of ms in the house.
☐ Water pump: does not short cycle	
☐ Galvanized pipes do not restrict wa	ter flow Well water test is acceptable
☐ Hot water temperature between 11	8 - 125 degrees Fahrenheit
<u>Electrical</u>	
☐ Visible wiring: in good condition, no secured and protected	"knob-and-tube" wiring, no exposed splices, cables
